INTERNATIONAL ENGINEERING CONFERENCE

23-24
FEBRUARY
2022

Towards Engineering Innovations and Sustainability

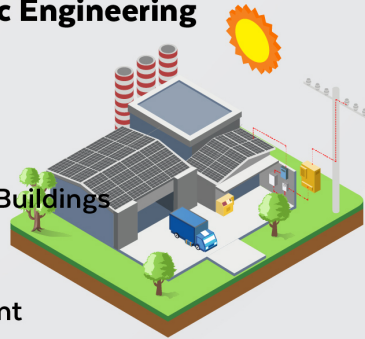

Track 1 - Construction Engineering

Structural Materials
Structural Engineering
Earthquake Engineering
Sustainable Construction
Composite Materials
Construction Management

Track 2 - Environmental and Hydraulic Engineering

Environmental Engineering
Green Buildings
Smart Buildings
Restoration and Rehabilitation of Historical Buildings
Renewable Energy
Hydraulic Engineering
Sustainable Materials and Waste Management

Track 3 - Geotechnical and Transportation Engineering

Transportation Engineering
Geotechnical Engineering
Surveying and Geomatics Engineering
Highway Engineering
Pavement Engineering

Track 4 - Digital & Wireless Communication

Mobile and Smartphone Applications
Digital Electronics

Track 5 - Computer Engineering & IT

Data Science & Big Data
Big Data Analytics
Computer & Information Security
Artificial & Computational Intelligence
Communications, Networking & Protocols
Parallel & Distributed Processing
Signal and Multimedia Processing
Biomedical and Health Informatics
Cloud Computing
Soft Computing
Data Mining
Business Intelligence
Information Systems
Information Technology
Bioinformatics

Track 6 - General Engineering & Applications

Mechanical Energy
Software Engineering and Applications
Green Computing for Sustainable Energy
Mechatronics
Mechanical Engineering and Technology
Power & Energy Engineering
Petroleum Engineering
Mining Engineering
Mineral Resources Engineering
Mineral Processing Engineering
Tunneling Engineering
Chemical Engineering
Electrical and Electronics Engineering
Robotics, Automation & Control Systems
Embedded Systems
