TIU Engineering Faculty Advances SDG 6 Through Water Supply and Sewerage System Course

Tishk International University's Engineering Faculty incorporates the Water Supply and Sewerage System course into its curriculum, aligning with SDG 6: Clean Water and Sanitation. This course equips students with essential knowledge to ensure sustainable water management, improve water quality, and promote efficient wastewater treatment. By focusing on access to safe and affordable drinking water, proper sanitation, and hygiene solutions, the course empowers future engineers to address global challenges. TIU's commitment to water sustainability contributes to achieving universal and equitable water access, fostering resilient infrastructure, and safeguarding environmental health for all.
