TIU Promotes SDG 7 Through 8th Annual Clean and Love Kurdistan Campaign

On April 29-30, 2024, Tishk International University's Business and Management Department organized the 8th Annual Clean and Love Kurdistan Campaign, supporting SDG 7: Affordable and Clean Energy. The campaign, in partnership with the Ministry of Municipality and Erbil's Environment Directorate, aimed to foster environmental sustainability through cleanup efforts and tree planting. Over 100 students and faculty participated, promoting energy efficiency and sustainable practices. The initiative emphasized reducing waste, preserving green spaces, and raising awareness on renewable energy solutions. The event concluded with a seminar highlighting sustainable energy's role in environmental conservation.

Tishk International University Leads Tree Planting Initiative for a Greener Future

In alignment with SDG 15: Life on Land, Tishk International University (TIU) collaborated with the Directorate of Gardens and Parks Engineering to organize a Tree Planting Project on March 14, 2023. The initiative aimed to expand green spaces, enhance biodiversity, and raise awareness about environmental sustainability. Students and faculty planted 200 trees on campus, fostering community engagement and reinforcing their commitment to ecological preservation. This event highlights the crucial role of educational institutions in protecting terrestrial ecosystems and combating climate change, demonstrating that collective efforts can lead to a healthier, greener future for all.

On September 24th, Tishk International University's Medical Analysis Department organized a medical ethics training program, emphasizing SDG 15 (Life on Land) through fostering ethical practices that respect the well-being of all individuals, reflecting a commitment to biodiversity and equity. Led by Dr. Shaween Z. Jamil, the training comprised six sessions covering essential ethics topics, including codes of ethics, ethical communication, and bioethics, promoting ethical care that respects diverse socio-cultural backgrounds. The program highlighted the importance of patient autonomy, beneficence, non-maleficence, and justice—principles that encourage an ethical foundation aligning with SDG 15's vision of respecting life in all forms. This approach fosters compassionate healthcare that respects human dignity, paralleling environmental respect in sustainable development practices.
