

TISHK INTERNATIONAL UNIVERSITY

Sustainable Development Goals

Reports: 2023-2024

On January 22nd, 2024, the Dean of Students at the Faculty of Pharmacy at Tishk International University organized a productive visit to Awamedica. This collaboration included discussions on formalizing a Memorandum of Understanding (MoU) and establishing an advisory committee to enhance partnerships. Initiatives discussed encompassed guest lectures, workshops, internships, and shared research projects. The inclusion of industry-based technical electives in the curriculum was emphasized, with Awamedica committing to support certification courses. This collaboration aligns with SDG 17, fostering partnerships that promote community welfare and innovation in pharmacy education, ultimately contributing to improved health outcomes.

On October 22, 2023, the Industrial Advisory Committee of the Faculty of Pharmacy at Tishk International University (TIU) visited Awamedica, a pharmaceuticals company in Erbil, to strengthen collaboration between academia and industry. The committee members, including Dr. Esra Tariq, Dr. Javed Ahmad, and Dr. Ahmad Hamdy, engaged in productive discussions with CEO Dr. Nizar Ismet about advancements in drug research and development. This meeting emphasized the critical role of partnerships in addressing local healthcare challenges and enhancing educational outcomes. By exploring joint initiatives, the visit underscored the commitment to achieving SDG 17, promoting sustainable collaboration across sectors for community benefit and innovation.

The English Language Teaching and Mathematics departments have introduced new technical and non-technical elective courses emphasizing the 17 United Nations Sustainable Development Goals (SDGs), with a specific focus on SDG 17, which underscores the importance of partnerships for sustainable development. The courses, titled “Building a Better World: UN’s 17 Goals” and “Inclusive English: Bridging Cultures and SDGs,” aim to explore collaborative strategies and multi-stakeholder partnerships essential for advancing these global objectives. By incorporating real-world examples and case studies, students will develop a deeper understanding of how effective collaboration can tackle complex challenges, fostering a culture of partnership and cooperation in addressing sustainability issues.

The Mathematics Education Department at Tishk International University (TIU) recently visited Ishik Primary School in Duhok to enhance educational collaboration. This visit fostered connections between TIU and the local educational community, emphasizing the importance of partnerships in advancing teaching practices. By exploring the school's innovative methodologies and infrastructure, the delegation gained valuable insights into effective pedagogical techniques. The visit also facilitated informal networking, creating opportunities for future collaboration. Dr. Orhan Tug highlighted the significance of these partnerships in bridging theory and practice, showcasing TIU's commitment to sustainable development through educational cooperation, in line with SDG .17's focus on partnerships for the goals

On March 7th, 2024, the Faculty of Law at Tishk International University (TIU) signed Memoranda of Understanding (MOUs) with Rey Rasty and Naji Companies to enhance collaboration in legal education. This initiative aims to establish a summer training program for fourth-grade students, providing practical legal training and fostering professional development. By bridging academic study and real-world practice, this partnership exemplifies SDG 17's focus on strengthening partnerships for sustainable development, emphasizing the importance of cooperation between educational institutions and the private sector to prepare students for their future careers effectively

Tishk International University Expands Curriculum to Promote Sustainability through SDG 17

In a strategic collaboration to advance SDG 17 (Partnerships for the Goals), experts at Tishk International University (TIU) recommended new sustainability-focused courses across departments. Dr. Soorkeu proposed Solar Energy, Wind Energy, and Sustainable Aviation for the Aviation Engineering Department, while Mr. Dلمان Aziz suggested Sustainability and the Interior Environment, Human Response to Built Environments, and Sustainable & Reuse Design for Interior Design. These courses will equip students with cutting-edge knowledge to drive sustainable innovation, reinforcing TIU's commitment to cross-sectoral cooperation in shaping a greener, more sustainable future
