

Eligibility Criteria for Participation

☐	The project must be a final-year graduation project completed by 4th or 5th-year bachelor students.
☐	All team members must be currently enrolled students at the university at the time of the competition.
☐	The project must be completed within the current academic year.
☐	The project must demonstrate original work and should not be copied or plagiarized.
☐	The project must offer a solution or contribution that is relevant to the field of study.
☐	The project must demonstrate a high level of creativity or innovative thinking
☐	The project should reflect the students' own ideas and intellectual contributions, not a reproduction of existing work.
☐	Use of unconventional or cross-disciplinary approaches will be considered an added value.
☐	The project must demonstrate application of knowledge, theory, or practical skills gained through the academic program.
☐	Projects must be safe, ethical, and comply with university or national regulations
☐	The project should show evidence of research, design, and/or innovation.
☐	Each team must be available to present their project during the competition
☐	All required documents and materials must be submitted by the registration deadline.
☐	The project must not have previously won prize in a national or international competition.
