

TISHK INTERNATIONAL UNIVERSITY

Sustainable Development Goals

Reports: 2024-2025

Under the name “Environmental Health and Safety Community University Partnership Project,” the Nursing Department of the Faculty of Nursing at Tishk International University (TIU) organized a community service project in partnership with Ishik Kindergarten. Ms. Hanan Azad supervised the project, which took place over two days .on November 19 and 26, 2024

The first day, children were given a thorough general wellness assessment by nursing students, who evaluated their general health and highlighted any possible issues. Following the assessment, the students gave the kids and their teachers thorough guidance on how to make the kids’ lives better. These guidelines, which emphasized the need of preventative care and good lifestyle choices, included advice on appropriate eating, exercise, sleep hygiene, and mental health support. In order to guarantee that the child’s physical and developmental needs were satisfied for the best possible growth and happiness, the students also provided guidance on maintaining a .balanced routine and encouraging emotional well-being

The second day, children gathered in the seminar hall, where nursing students gave an educational session on promoting health and wellbeing. Important subjects including appropriate handwashing methods, emotional control, keeping a positive attitude, and the value of a balanced diet were all emphasized in the seminar. The nursing students encouraged children to actively participate in the hands-on demonstrations to make sure they understood these ideas completely. Children discussed good eating practices, learned how to .express and control their emotions, and practiced handwashing skills

A thorough overview and in-depth explanations of every important subject were given to the children. In the meantime, they received .gifts as well, which maintained the lively and interesting mood

The success of the occasion was largely due to the exceptional contributions made by our second-grade students. The Faculty of Nursing hopes that this initiative will encourage future students to engage in community service projects and expresses its profound .gratitude to all those participating

Environmental Health and Safety Community University Partnership Project

Safety and Infection Control in School-Age Children: A Community-University Partnership Project

In a meaningful effort to enhance early childhood education and development, Nursing department at Tishk International University successfully implemented a school development and wellness project in partnership with Ishik Brayaty School, under the supervision of Ms. Hanan Azad. The project took place over two days: November 19 and 26, 2024

The project was set up to highlight how important schools are to fostering young students' overall development. The objective of this project was to improve students' mental, emotional, physical, and academic well-being while preparing them for long-term success through the collaborative efforts of university staff and students

They participated in a range of interesting activities designed to foster curiosity, confidence, and communication on the first day. In a secure and encouraging setting, nursing students worked closely with the pupils to help them develop critical social and intellectual skills. Students were encouraged to express themselves confidently and to develop a positive sense of self

Training sessions centered on healthy behaviors, classroom cooperation, and emotional well-being were conducted on the second day. In addition to supporting learning objectives, the sessions were developed to encourage positive behaviors including resilience, teamwork, and emotional control. Students were able to understand important ideas through engaging and exciting presentations that kept the atmosphere lively and pleasurable

This experiment demonstrated the significant influence that a supportive school environment has on how a student grows. Through the integration of health and wellness education with academic learning, the project demonstrated a comprehensive approach to school age development. Additionally, it gave university students invaluable practical experience that helped them comprehend the significance of their future jobs as carers and educators

Nursing department extends its sincere appreciation to the participating school and all students involved. This project serves as a model for how educational institutions can work together to foster healthy, confident, and capable future generations

Breast Self-Examination for Early Detection of Breast Cancer

On February 27, 2025, the Faculty of Nursing at Tishk International University organized a community health project. As part of this initiative, a seminar titled “Breast Self-Examination for Early Detection of Breast Cancer” was conducted by Ms. Marwa Saadi Abdullah and Ms. Dilan Jamal Nuri at Shinirwe Combined Secondary School, under the supervision of

TIU’s Marketing Unit Mr. Jengiz and Ms.kanar

Nursing Department’s Marketing representative: Mr. Goran Noori

This seminar aimed to promote health awareness and educate students on the importance of self-care and .early detection practices, fostering a culture of well-being within educational settings

The Essential Responsibilities of First Aid Providers

Community University Partnership Project

Faculty of Nursing at Tishk International University recently held a social community project on Monday & Wednesday, 16 & 18 December 2024, for 2 High Schools Entitled (The Essential Responsibilities of First Aid Providers in Emergency Situations for the Community) & (First Aid for Injuries and Accidents)

The 1st seminar, which was held on 16 December 2024, was presented by Ms. Shaimaa Shahab, a Research Assistant in the Faculty of Nursing, for Nanakaly High School. The presentation aimed to raise awareness and provide attendees with the critical knowledge and skills required to address emergency situations in the community

During the seminar, attendees gained a thorough understanding of crucial issues such as identifying emergency situations and recognizing them. It also focused on the Ethical and Legal requirements of first aid providers. It also included interactive discussion

The 2nd seminar, which was held on 18 December 2024, was presented by Mr. Ismail Khalid & Mohammed Harem, who are Research Assistants in the Faculty of Nursing, for Ishik & Nilufer Schools. A seminar on “First Aid for Injuries and Accidents” emphasized the importance of life-saving skills in schools, teaching participants how to handle common emergencies like cardiac arrest, fractures, choking, and bleeding. The event aimed to foster a culture of safety and preparedness, empowering school communities to respond effectively to accidents and protect lives

Tishk International University’s project demonstrates its dedication to community education and development by providing content and chances for individuals to develop emergency response skills

Embarking on an intellectual journey: Students from TIU are exploring Germany under the The German Academic Exchange Service (DAAD) Program.

Students from Tishk International University (TIU) went on an educational trip to Germany, led by a staff member from the Computer Education, Computer Engineering, and Information Technology (IT) Departments. This immersive event occurred from May 23rd to May 30th, providing participants with an exceptional chance to explore Germany's cutting-edge technical environment and vibrant cultural legacy.

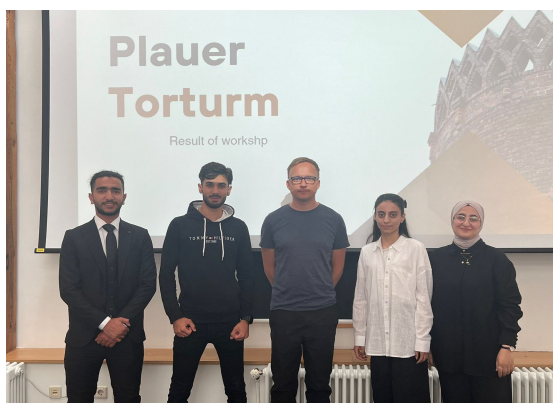

Tishk International University | computer-education Department

This academic expedition demonstrated the collaborative efforts of students and instructors from three different departments, creating a dynamic learning environment where varied viewpoints and talents came together. During the trip, the participants took part in a range of activities that went beyond traditional schooling. This gave them the opportunity to see Germany's historical sites, cutting-edge technological centers, and leading academic institutions involved in research and development.

The students gained a distinct perspective on Germany's seamless blending of history and contemporary by visiting renowned cities like Berlin and Munich. The students acquired essential knowledge about the latest breakthroughs in their areas of study and the significance of multidisciplinary cooperation in addressing global issues by visiting prestigious universities and state-of-the-art technological facilities.

The purpose of the voyage was to foster a global perspective among the participants, highlighting the importance of cross-cultural comprehension, technical advancement, and the integration of traditional values with modern development. The students were able to broaden their perspectives and get a greater understanding of the intricacies of the global academic environment via interactive conversations, practical experiences, and meaningful cross-cultural connections..

<https://tiu.edu.iq/nice2025-celebrates-10-years-of-innovation-and-academic-excellence/>

The 10th edition of the National Innovation Competition in Engineering (NICE2025) was successfully held at Tishk International University (TIU) on Sunday, May 11, 2025. This event marked a decade of commitment to fostering student innovation, academic collaboration, and interdisciplinary excellence.

What began ten years ago as a local academic initiative has evolved into a nationally recognized competition. It now showcases the region's brightest engineering and design talents. NICE2025 stands as a symbol of academic growth, technological creativity, and institutional unity.

Growing Impact and Participation

This milestone year saw the competition reach new heights, with:

Over 300 student projects submitted.

253 accepted for final presentation and evaluation.

Nearly 600 registered members, including 248 supervisors and 117 jurors. Of these, 100 actively participated in the assessment process.

These figures reflect the growing scale and reputation of the competition across academic and professional communities.

Strong Interdisciplinary Contributions

Projects were submitted across a wide range of departments, including:

Computer Engineering

Architecture

Interior Design

Mechatronics

Petroleum and Mining Engineering

Civil Engineering

Information Technology

Aviation Engineering

The diversity and depth of these projects reflect the technical capabilities, creativity, and dedication of students and staff across disciplines.

Regional Collaboration

NICE2025 brought together delegations from over 15 universities and institutes across the Kurdistan Region and Iraq. This reinforced its role as a unifying academic platform.

Major contributors included Tishk International University (Erbil), with 174 projects. Additional universities across the region participated actively, highlighting the spirit of collaboration and a shared commitment to innovation.

Awarding Excellence

This year, three winners were selected from each of the eight competition categories, recognizing a total of 24 innovative projects for their outstanding contributions.

To celebrate their achievements, the winners were awarded:

8 Lenovo laptops

8 tablets

8 smartphones

Furthermore, certificates of appreciation and participation were distributed to all participating universities, honoring their continued support and engagement.

Acknowledgment

The organizing committee extends its sincere appreciation to all students, supervisors, jurors, university departments, sponsors, and partner institutions. Their contributions made NICE2025 a resounding success.

As the event marks its 10th anniversary, NICE continues to serve as a platform for empowering young minds, encouraging innovation, and strengthening academic partnerships for years to come.

Signing of MOU Between Faculty of Pharmacy and Amr Lab

The Faculty of Pharmacy at Tishk International University (TIU) celebrated a pivotal moment ON August 27th, with the signing of a Memorandum of Agreement (MOA) with AmrLab. This partnership is expected to foster enhanced collaboration in pharmaceutical education, research, and professional development, while also bridging the gap between academia and the pharmaceutical industry.

The signing ceremony took place at the Faculty of Pharmacy, where Prof. Dr. Abdul Samad, Dean of the Faculty of Pharmacy, and Dr. Amar Abdulah, a distinguished guest of honor, led the proceedings. The event was further enriched by the presence of Dr. Fahad from AmrLab, who played a key role in the discussions. Dr. Ersa Tariq Bayrakdar and Dr. Ahmad H. Ibrahim, from the Faculty, were also in attendance. Prof. Dr. Abdul Samad expressed his excitement about the collaboration, stating, "This agreement signifies a major advancement for both our faculty and AmrLab. It will create new opportunities for research, knowledge exchange, and professional development, benefiting both our students and faculty members."

Dr. Amar Abdulah emphasized the value of industry-academia collaboration in his remarks, noting, "Our partnership with the Faculty of Pharmacy is poised to drive innovation and elevate the quality of pharmaceutical practices." Dr. Fahad echoed these sentiments, highlighting the importance of integrating new technologies and industry trends into the academic framework.

The MOA outlines several areas of cooperation, including joint research projects, faculty and student exchange programs, and the development of cutting-edge educational materials. A key focus of the meeting was on engaging pharmacy students with the industrial sector and familiarizing them with the latest technologies and changes in the job market. This initiative aims to better prepare students for the evolving demands of the pharmaceutical industry. By developing new educational materials and involving students in research and exchange programs, the collaboration enhances the quality of education and prepares students for the pharmaceutical field.

Pharmacy International Exchange Program

The Faculty of Pharmacy at Tishk International University (TIU) is excited to share that one of its remarkable students has been chosen for an international exchange program. This program aims to help students with their skills in leadership, learn about new cultures, and strengthen their academic skills by allowing them to experience life and education in the United States.

With the support of the Dean, Dr. Abdulsamad Salahuddin, and the Head of the Department, Dr. Subasini Uthirapathy and Dr. Esra Tariq, the student was able to complete a three-week journey filled with memorable experiences, to the United States. During the program, the student was able to interact with people from all backgrounds, had many opportunities to improve on skills of leadership and enhance her education on various topics from the sessions that were provided, contributing to lifelong learning and quality education. This accomplishment showcases the department's dedication to helping students become globally aware and successful individuals. The exchange program strengthens partnerships between Tishk International University and institutions in the United States, promoting global cooperation and cultural exchange.

We extend our warmest congratulations to Tara Fattah for being accepted into this well-respected program. Her hard work and commitment have made the university proud, and we are sure she will continue to be a model representative of Tishk International university. The Faculty of Pharmacy is committed to helping students pursue these kinds of opportunities. We ensure the students the kind of mentorship which helps them succeed in such international programs.

Exploring Opportunities with Industry Experts: Guest Lecture and International Student Exchange Program Briefing

On November 18, 2024, the Faculty of Pharmacy at Tishk International University, in collaboration with the Takvin Organization, organized an event titled “Exploring Opportunities with Industry Experts: Guest Lecture and International Student Exchange Program Briefing.” The event aimed to educate students about the benefits of international exchange programs, highlighting how these opportunities can enhance their academic, personal, and professional growth.

The event featured three distinguished speakers:

Asst. Prof. Dr. Salah Hassan, Head of the Takvin Organization, spoke on “The Value of International Programs.”

Dr. Amina Haji, a medical doctor, shared her valuable insights from the Study of the U.S. Institutes (SUSI) program in a presentation titled “Insights from the SUSI Program.”

Dr. Ahmed Hamdi, a lecturer at TIU, provided a detailed overview of the various exchange programs available to students.

This informative event inspired students to explore international exchange opportunities and equipped them with the knowledge and confidence to pursue these valuable experiences. The Faculty of Pharmacy is thankful for the support from Dean Dr. Abdul Samad and the Head of the Pharmacy department, Dr. Mohammad Javed Naim, in successfully organizing the event.

Pharmacy Organized 9th National Pharmacy Workshop on Diabetes

The Faculty of Pharmacy at Tishk International University, in collaboration with Shar Hospital and Getz Pharma, hosted a National Pharmacy Workshop on Diabetes entitled “Better Patient Care Through Physician and Pharmacist Collaboration” on November 17, 2024. The workshop aimed to enhance diabetes management through teamwork among healthcare professionals, focusing on improving health outcomes, raising awareness about early diagnosis, and effective management strategies.

The event was introduced by Asst. Lecturer, Dr. Shajwan Salar, who highlighted the global burden of diabetes with recent statistics. Asst. Prof Dr. Idris Hadi, Head of the Board of Trustees, gave a welcoming speech. Asst. Prof. Dr. Sultan Abu Orabi, President of TIU, highlighted the importance of health awareness and diet for the management of diabetes. Asst. Prof. Dr. Abdulsamad Salahuddin, The Dean of the Faculty of Pharmacy, gave an overview of diabetes and its challenges, stressing the importance of ongoing education.

In the first session, Dr. Karzan M. Abdullah, a clinical cardiologist, presented “Type 2 Diabetes Management Is More Than Just HbA1c Control,” followed by Dr. Haider Sabir, a specialist general surgeon, who introduced the basics of diabetes and the significance of early diagnosis. Dr. Dawan, Manager of Getz Pharma, discussed essential information about the company and the importance of collaboration between educational institutions and pharmaceutical industries.

Free blood glucose monitoring tests were provided, and students organized interactive activities and games, creating a lively atmosphere that added a dynamic and engaging element to the day. The workshop concluded with discussions on strengthening teamwork in healthcare, leaving attendees inspired and better equipped to address diabetes care challenges through knowledge sharing, practical collaboration, and innovation.

Autism Care and Awareness Community Service Project

Initiated on October 6th, 2022, and accomplished on May 18th, 2023, the Faculty of Pharmacy at Tishk International University (TIU) successfully implemented this year's Autism Care and Awareness Community Service Project. The project was carried out under the supervision of Dr. Rozhan Arif, the Dean of Students Representative and Coordinator of the Faculty of Pharmacy, along with Research Assistants Dr. Saya Ameer and Dr. Sarmad Jabbar, as well as other supervisors including Dr. Ibrahim Khudhair, Dr. Omar Najmaddin, and Dr. Mohammed Sultan. Numerous volunteers from different grades also participated in the project.

Each year, the organizers of this project plan a series of activities aimed at raising awareness, understanding, and acceptance of autistic individuals. These activities span over several months and involve a range of preparations, workshops, fundraising events, and visits to autism centers to enable students to engage with and witness the daily struggles of those affected.

The project began by obtaining permission from the center's director on October 6th, 2022, to commence the project and coordinate access. Organizers established a communication group with volunteers, assigning responsibilities and distributing tasks. Meetings were held with the volunteers to design brochures, assign tasks, and schedule activities including shopping.

One of the key events was a fundraising event held on February 22nd, 2023, aimed at gathering support and financial aid from TIU students, staff, and external individuals. Faculty-student volunteers worked diligently to collect funds through various activities, such as selling homemade foods and handicrafts, providing henna designs, conducting competitions, and offering blood pressure, blood sugar, and body mass index measurements. TIU Presidency, staff members, and students enthusiastically visited the stands and made significant contributions to the fundraising efforts.

On March 30th, a group of volunteer students from the faculty, accompanied by their supervisor, Dr. Saya Ameer, went shopping to purchase stationery items for autistic children at an Autism Center in Erbil. The students and supervisors packed the bags with the items, prepared sweets, and adorned the center with balloons and other decorations ahead of the ceremony held on April 2nd, which coincided with World Autism Day.

During the ceremony on April 2nd, nearly 17 volunteer students, along with supervisors and other doctors, including the Dean and Head of Department, visited the Autism Center. The event took place in the presence of the children, their families, and invited guests. Brochures containing practical advice on caring for autistic children were distributed to parents, aiming to provide them with support and guidance.

The event included various activities organized by the volunteers to engage and entertain the autistic children and their families. These activities encompassed face painting, hand printing, and other interactive experiences, allowing the children to express themselves creatively and enjoy the event. The success of the project was evident as the children and their families expressed their gratitude for the volunteers' efforts and the Faculty of Pharmacy's involvement.

Finally, on May 18th, 2023, the Pharmacy Faculty arranged a final and comprehensive visit to the center to deliver all the gifts prepared for the autistic children and their teachers. These gifts included specialized toys and exercises tailored to each child's autism and cognitive impairment level. Students also had the opportunity to engage in various activities with the autistic children throughout the day.

We hope that all the goals and objectives of this project have been achieved. The project serves as a motivation for our students to care for and raise awareness about autism within our community. Continued collaboration and contributions are essential to further develop the educational support for autistic children and meet their specific needs.

<https://pharmacy.tiu.edu.iq/autism-care-and-awareness-community-service-project/>

5th National Tishk Pharmaceutical Conference

On April 21-22, 2025, the Faculty of Pharmacy at Tishk International University (TIU) organized its 5th National Tishk Pharmaceutical Conference. The two-day event focused on the theme, “The Role of Kurdish Medicinal Plants in Achieving Sustainable Development Goals (SDG 3): Good Health and Well-Being.” The first day took place at the Dedeman Hotel, and the second day was held at the Faculty of Pharmacy, TIU.

Day 1: Dedeman Hotel

The conference began with a welcoming speech by Asst. Prof. Dr. Mohammed Javed, Head of the Pharmacy Department. This was followed by remarks from Prof. Dr. Muhammed Kalar, Representative of the Minister of Higher Education, who highlighted the global significance of herbal plants and their alignment with SDG 3. Asst. Prof. Dr. Muhammed Ozdemir, Vice President of TIU, expressed his appreciation for the faculty’s efforts, while Asst. Prof. Dr. Abdulsamad Salahuddin, Dean of the Faculty of Pharmacy, welcomed the audience and provided an overview of the faculty’s accomplishments, including its recent AHPGS accreditation.

The first session was chaired by Asst. Prof. Dr. Subasini Uthirapathy, and featured keynote speeches by Prof. Dr. Azeez A. Barzinjy, on “Harnessing Plant Power: A Sustainable Approach to Nanoparticle Synthesis,” and Prof. Dr. Salah Tofik Balaky, who presented “Gene Expression Profiling Using RT-PCR.” The second session was led by Dr. Ahmad Hamdy, with a seminar by Asst. Prof. Dr. Lana Yousif on “Complementary and Alternative Medicine.” The third session, chaired by Dr. Kamaran Javed, featured online talks from Prof. Fatma M. Abdel Bar and Mrs. Sawsan S. Al-Rawi, and a final presentation by Dr. Abdulwahab Jameel on “The Role of Genetic Testing...in Cancer.”

<https://pharmacy.tiu.edu.iq/faculty-of-pharmacy-at-tishk-international-university-organized-the-5th-national-tishk-pharmaceutical-conference-2/>

TIU-Faculty of Pharmacy Educational Visits to Bio Laboratories.

The Faculty of Pharmacy at Tishk International University organized educational visits to Bio Labs, Erbil, an advanced biomedical laboratory. The visits took place over six weeks on October 30, November 6 & 27, and December 4, 11 & 17, 2024.

These visits aimed to provide pharmacy students with practical exposure to laboratory equipment and techniques essential for modern diagnostics. Guided by Dr. Dania Awni Kamal, students were introduced to devices such as spectrophotometers, hematology analyzers, and centrifuge machines. The laboratory staff demonstrated how diagnostic tests are performed and explained the function and importance of each device. Students also gained insights into equipment calibration, accuracy, and maintenance.

This initiative successfully bridged the gap between theoretical knowledge and real-world applications, helping students understand the role of biomedical technology in healthcare. The visit was facilitated by Dr. Abdulsamad Salahuddin, Dean of the Faculty of Pharmacy, and Dr. Mohammad Javed Naim, Head of the Pharmacy Department.

<https://pharmacy.tiu.edu.iq/tiu-faculty-of-pharmacy-educational-visits-to-bio-laboratories/>

TIU Pharmacy signed a Memorandum of Agreement with the College of Pharmacy at Misan University.

Faculty of Pharmacy Presented a Seminar on the Role of Pharmacists in Healthcare

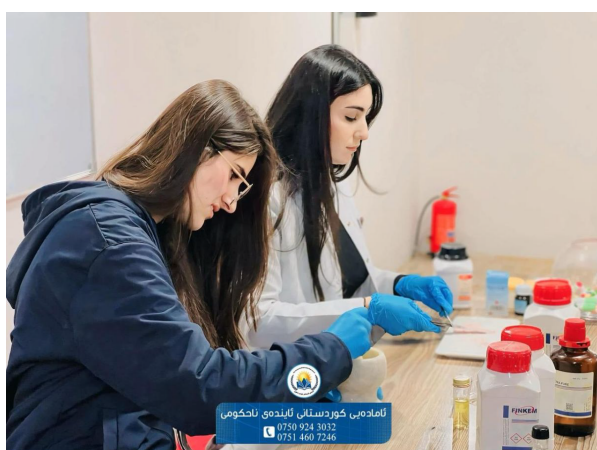

On February 27, 2025, the Faculty of Pharmacy at Tishk International University, Erbil, held an informative seminar at Aynda Private Kurdish High School. The seminar, titled “The Role of Pharmacist and Healthcare of Patients,” aimed to educate students on the vital role of pharmacists in healthcare.

The esteemed staff members—Hedi Othman, Sana Sirwan Salih, and Serwa Falah—presented an in-depth look at the responsibilities of pharmacists and the significance of over-the-counter (OTC) medications. They emphasized the importance of the pharmacist-patient relationship in ensuring proper medication use and patient well-being.

An engaging video showcased the Faculty of Pharmacy’s labs and the practical application of pharmaceutical formulations, such as preparing ointments with natural ingredients like almond and lemon oil. This was followed by an interactive session where students gained hands-on experience by preparing ointments themselves under the guidance of the presenters.

The seminar was well-received by the students of Aynda High School. The visit was made more memorable by the respectful and supportive presence of the school director, Draxshan Faiq Jaff, and assistant director Fauzya, who expressed their appreciation with certificates and gratitude.

TIU Faculty of Pharmacy Organizes 7th International Pharmacy Workshop

On February 6, 2025, the Faculty of Pharmacy at Tishk International University organized the 7th International Pharmacy Workshop (IPW) to mark World Cancer Day. The workshop's theme was "Recent Progress in Diagnosis and Treatment of Cancer," and it was held in collaboration with Takvin and Amr Lab.

The event began with a welcome speech by Prof. Dr. Sultan Abu Orabi, President of TIU. Asst. Prof. Dr. Abdulsamad Salahuddin, Dean of the Faculty of Pharmacy, introduced the workshop's theme, emphasizing the need for continuous research.

The first session featured three speakers:

Dr. Luqman Rahman, Assistant Professor in Oncology, spoke about "From Awareness to Action: Empowering the Next Generation in the Fight Against Cancer."

Dr. Suzan Hoshyar, Director of the Breast Center and Adjunct Faculty at UKH, presented "Breast Cancer - We Can Fight It, It Is Not a Death Sentence."

Dr. Fahad Abdulwahab, a Hematopathologist, gave a talk on "Delivery of Advanced Hemato-Oncological Lab Tests to Those in Need: Creativity, Communication, Collaboration."

The second session featured two online keynote speakers:

Dr. Amin Malik from Research LTD discussed "Botanical Drugs for Cancer Therapy."

Dr. Hassan A. Rathore, Associate Professor of Pharmaceutical Sciences, presented "Molecular Mechanisms in Lung Adenocarcinoma."

The workshop ended with a certificate distribution ceremony to recognize the efforts of the organizers, committee members, and volunteers. This event supported better healthcare, high-quality education, scientific research, and collaboration, which are all essential for making progress in the fight against cancer. The workshop was made possible with the support of the Rectorate, Dr. Abdulsamad Salahuddin, Dean of the Pharmacy Faculty, and Dr. Mohammad Javed Naim, Head of the Pharmacy Department.
